

Meeting 2 (11/24/2015)

- Reached all MVP goals
- Only picture from facebook otherwise gravatar
- Only a few movie interest slots
- Need more filtering for location and movies
- Separation of tasks so no overlapping work
 - Create separate git branches
 - Git hub issue to assign tasks or message on slack to notify task working on
- To avoid refactoring old code: anticipate changes, start with good design, make easy to change
- Chat messages may be sent slowly because hosted on Heroku
- Tests take a while, but not terrible → not really a problem for us
- Add pictures for users
- Using OMDb for movie database
 - Cache data
- Major Functionality to add:
 - User Rating
 - Cleaning up UI
 - * Movie tagging and matching
